SERVE and LEARN ABROAD with ENGINEERS IN ACTION

EIA offers opportunities for undergraduate and graduate students to **live, learn and work** in rural Bolivian and Ecuadorian communities. With our International Service Learning program, you get to pick your adventure and the experience you’ll remember for a lifetime.

IMMERSE YOURSELF

You can be a tourist any time. But with an EIA immersion experience, you’ll **live** and **work** in-community for three weeks or three months; it’s up to you. Whatever you decide, you’ll get a true Bolivian or Ecuadorian experience. Our staff comprises native professionals who know the people and know the land. You’ll go home with a deeper understanding of life in a different world. **All you have to do is say YES.**
MAKE A REAL IMPACT

Engineers in Action builds partnerships to bring clean water, sanitation, and critical infrastructure to communities in need.

We enlist students of engineering, public health and international studies to work with our Bolivian engineers and health professionals to assess the communities’ needs, complete baseline studies, build relationships, develop plans for infrastructure, and work on the projects that bring life-giving clean water, sanitation, and health education to the people.

“I learned how to live disconnected; I learned about connecting with people [through] real life experiences and how to truly learn from one another. I believe not only that we learned something but that the community benefitted from our trip.”

- Saskia Romero, Univ. of Oklahoma

topographic surveys
community baseline study needs assessment
community census COMMUNITY MAPPING
water quality & quantity testing
Ask anyone who’s done it, there is no experience like living as a local in another country. With EIA’s Service Learning program, you are part of the community you serve. Throughout your time there, you’re working on a project that will save many lives and provide a foundation upon which that community can continue to flourish. By learning about another way of life, you’ll engage in some self-exploration and come away from your experience abroad with something that will stay with you forever.
Live and work in our offices in La Paz, Bolivia, or Quito, Ecuador for 6 months to a year. You’ll spend your time supporting multiple communities and programs, traveling frequently throughout the country. Couple your internship with a practicum program. No matter what you decide to do, you’ll leave South America with a unique experience to add to your resume as you seek a job back at home.

ADVENTURE WITH US.
